Clicked a scam link?

It happens. Act quickly.

First, stop and check

- Close the page and don’t enter anything else.
- Ignore messages asking for a code or more details.
- Follow the steps below that match what you shared.

1

Only clicked?

Report the message as spam. If you downloaded a file or installed an app, stop using the device and get trusted IT help.

2

Entered a password?

Use the real app or website to change it. Change it anywhere you reused it and turn on two-step verification.

3

Shared bank details or sent money?

Call your bank immediately using its official number.
