Caller asking for a security code? Don’t read it out.

They might say they’re from your bank and need to stop a payment.

1

Keep the code private.

Never read it out, even if the caller sounds official.

2

Hang up and check.

Use the bank’s app or the number on your card.

3

Already shared it? Act fast.

Contact your bank straight away and tell them what happened.

Your bank won’t ask for that code over the phone.
