SMALL BUSINESS / STAFF DISPLAY

Supplier needs access?

Give just enough access for the job.

From bookkeeping to website updates, connect suppliers through their own accounts so you can remove access later.

1 **Keep logins separate.**
Give each person their own account. Don’t share passwords.

2 **Limit what they can see and change.**
Grant only what the work needs. Avoid admin access by default.

3 **Remove access when the job ends.**
Set a review date and disable access when it’s no longer needed.
